

Teaching Computational Social Science: Where Do We Go from Here?

September 7th, 4–5:30 pm CEST (digital event)

Organizer: *Computational Methods Working Group*, University of Zurich/ETH

Digital panel discussion with inputs from:

Emese Domahidi

Junior Professor for Computational Communication Science, TU Illmenau

Cornelius Puschmann

Professor of Media and Communication, University of Bremen & Affiliate
Researcher at the Leibniz Institute for Media Research

Carsten Schwemmer

Interim Professor for Political Sociology, University of Bamberg & Computational
Social Scientist at GESIS

Stefanie Walter

Emmy Noether Research Group Leader, TU Munich

While the demand for computational social science (CSS) has risen in recent years, many universities have only started to integrate such courses in their curricula. Moreover, lecturers have to build corresponding courses from the ground up – while having to meet new didactic challenges. The focus of this panel discussion is therefore on the following two topics:

- (1) *Common challenges, experiences and questions* when teaching CSS
- (2) *Changes and policies* needed to establish CSS-related courses in institutions of higher education

Schedule

The event will take place on September 7th, 4–5:30 pm CEST via Zoom.
